

MUMI CORPORATE BCIN FUND

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The investment objective of a fund is to provide investors with a safe and stable investment vehicle that offers liquidity, low volatility, and a competitive yield. The fund aims to achieve returns above the benchmark of the average Namibian Bank call rate.

INVESTMENT PROCESS

The Fund invests in cash and high-quality capital market instruments. Investment decisions are guided by a focus on safety, liquidity, and yield. Securities are selected based on their low credit risk, short-term maturity, and competitive yield relative to other short-term investment options.

WHO SHOULD INVEST

The Fund is suited to investors seeking a low-risk, short-term investment that offers liquidity and stability.

RISK INDICATOR DEFINITION

These portfolios have no equity exposure, resulting in higher interest yields and stable capital values. These portfolios typically target returns in the region of 1% – 2% above inflation before tax over the long term.

FUND COMMENTARY

Inflation in South Africa edged slightly higher to 2.8% year-on-year in April, up from 2.7% in March, but remained comfortably below the lower bound of the South African Reserve Bank's (SARB) 3–6% inflation target range. In contrast, Namibian inflation moderated to 3.6%, down from 4.2% in the previous month, reflecting easing price pressures.

As expected, the SARB reduced its policy rate by 25bps to 7.25% at its May meeting. The Governor also reiterated the case for a lower long-term inflation target of 3%, suggesting a more dovish tone in future policy direction.

In the South African money market, Treasury bill yields declined by an average of 11bps over the month, led by a notable 19bps drop in the 91-day instrument. Meanwhile, Namibian T-bill yields were broadly stable, with the 4bps decline in the 364-day paper offset by a 4bps rise in the 182-day note.

The fund delivered a return of 0.68% for the month, bringing its year-to-date performance to 3.21%. The portfolio remains well positioned to deliver competitive risk-adjusted returns, with a continued focus on capital preservation and liquidity management amid a gradually easing inflation backdrop in both South Africa and Namibia.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, securities trading tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
